DURATECH TECHNOLOGY

Duratech Fans come with 5 years Duratech warranty. Duratech uses premium components, designed to deliver a superlative performance over the years.

Here's a quick look at the key components that form the core of the Duratech technology.

Duratech comprises of:

High Endurance Box Capacitor

Duratech's high-endurance box capacitor, with a patented adapter, ensures superior performance over a longer period as compared to ordinary oil-filled tube-type capacitors.

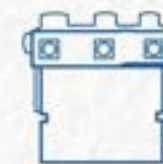

High Grade EMQ Bearing

EMQ bearings used for the Duratech motor are the highest grade bearings available for fans. They are silent and smooth, and have the additional advantage of reduced friction and vibration.

Dual Coat Winding

Dual-coat winding, offers double protection, ensuring better insulation and abrasion resistance when subjected to high temperatures and sudden overloads. This results in longer durability as compared to ordinary winding.

High Standard Hybrid Steel

Duratech fans use hybrid steel which is highly compatible with electric motors. The composition and the thickness of the steel ensures fan durability and efficiency.

*The Superflo's claim of India's highest air delivery fan (260 CMM air delivery) is based on internal laboratory tests conducted under ideal conditions and is applicable exclusively to Crompton's Metal Blade Induction ceiling fans in the 1200mm-1270mm sweep range. Actual performance may vary due to external factors. Crompton reserves the right to amend or withdraw this claim based on further testing or regulatory updates. Any Metal Blade Induction ceiling fan claiming superior air delivery must be registered with the Bureau of Energy Efficiency by December 31, 2024.
